

# SAE Skills Are Essential!

**#1** In Your SAE Plan, describe your project and choose SAE Skills as part of your Learning Objectives.

*Tip: Review all skill areas, and choose at least three SAE skills you hope to experience.*

**#2** In Your SAE Journal, record skills that relate to your activities.

*Tip: Daily or weekly journals are best. Record as many skills as you can for each activity and capture photos/files to illustrate your efforts.*

**#3** In Your SAE Reflection, describe learning activities for each year and specific skill outcomes listed in your SAE plan.

*Tip: Summarize growth in skills/responsibilities across each year (📅) and use planned skills (🧠) to describe measurable outcomes to illustrate results.*
